FACIAL REJUVENATION

LOUNGE ON LOCATION

Facial Rejuvenation Lounge is led by two dental professionals who are fully qualified and experienced in delivering medical facial rejuvenation treatments.

We have a combined total of 38 years practical experience. We have both been part of a team in a multi award winning cosmetic dental practice and in the past 5 years have extended our focus into facial aesthetics. As part of our normal daily practice we administer dental injections and have an advanced knowledge of facial anatomy which is of paramount importance when delivering cosmetic injections. We have extremely high level cross infection protocols in place to allow all clients peace of mind, while adhering to a strict confidentiality code of conduct.

“Our goal is to ensure our clients are well informed about the treatments we offer so they can make an educated decision as to whether this is the correct treatment for them or not. We want to manage our patient’s expectations and will do this with our comprehensive consultation and treatment program. We will only recommend treatment which we truly believe will enable our clients to meet their goals.”

We offer a programme of skin rejuvenation therapy that is specific to your individual needs.

TREATMENTS INCLUDE:

Wrinkle reduction using Botulinum Toxin (Type A)

Wrinkle reduction is a straight forward procedure that can have remarkable results in improving the wrinkles resulting from hyperactive facial muscles. It is used to treat frown lines between the eyebrows, horizontal forehead lines and 'crow's feet' around the eyes.

The muscle relaxant is injected with a very fine needle in the areas of concern. The actual procedure doesn't take longer than 20mins therefore can be done in your lunch hour! After the injection, the muscles will relax and the skin will smooth itself out over a period of 5 - 14 days. The effect usually lasts about three to four months initially and can be repeated when needed. Most patients require less frequent treatments over time. The result is a softer, more relaxed and pleasant appearance.

Dermal Fillers

A non-surgical cosmetic treatments used to bring a more youthful appearance by restoring volume or fullness to the face and lips. They work by reducing or eliminating lines, wrinkles and folds in the skin.

Our injectable dermal fillers are made of hyaluronic acid, which is a substance that exists naturally within the body. The actual treatment usually takes thirty minutes and lasts between six to nine months, with the effects being seen immediately.

Medical Grade Chemical Peels

Chemical Peels involve the careful application of a chemical exfoliant to the epidermis of the skin, specifically for the removal of superficial lesions and blemishes. Chemical Peels improve fine lines & wrinkles, uneven skin tone, shallow acne scarring, sun damaged skin, age spots, and sagging/ageing skin. Product range is Dermaceutic and Innovation Concept Peel.

Mask Peel - 30% Glycolic Acid superficial-depth peel

Milk Peel - 50% Glycolic Acid, 10% Lactic Acid & 4% Salicylic Acid-superficial/medium

TCA Peel – 15% TCA and 18%TCA - medium-depth peel

The practitioner will also advise you about skin care including sun protection and moisturisers.

Please make a consultation appointment to discuss the options for any of the skin rejuvenation treatments listed.
